To the Members of the Class of 1962:

One hundred and fifty years ago Bloomfield Township became a political entity when it separated from the City of Newark. Among the early concerns of the old Bloomfielders was that of education, and by the middle of the last century Bloomfield was one of the first towns in the State to have free public schools. This, then was the beginning of the academic kaleidescope about which this year's Memories was planned.

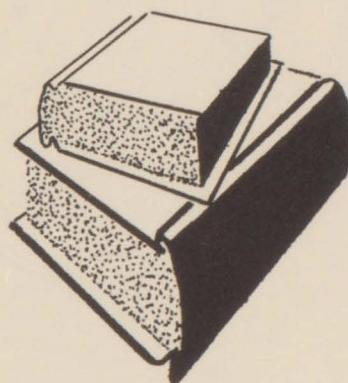

The theme of your yearbook is interesting. As one who is deeply concerned with the best in education in a free society, I agree that we must not leave to chance the final pattern of the kaleidescope. Purpose and careful planning must have an advanced position in guiding our destinies, and the destiny of the nation. It was not by chance that we have grown to greatness, as a people and as a nation; but chance does play a part in the variegated patterns of the kaleidescope. Briefly, I urge that thoughtful planning, earnest endeavor, and the best of ourselves shape our future. Select the best of your experiences, and use them wisely. Reject the dishonest, the spurious and the immoral. Continue to learn, and to grow in mind and spirit, so that we all may, in this time of world tension, add our strength to the national purpose.

With all good wishes,  
  
HARRY M. RICE  
Principal

1962

## FOREWORD

Education is the discipline of mind or character through study. More than this, education is people—people to teach and people to learn. Teachers can fill the air with their knowledge; but if no students hear them, the knowledge is wasted. In the same way, students can prepare their minds for the reception of knowledge; but if no knowledge is offered by the teacher, the pupils' preparations are in vain.

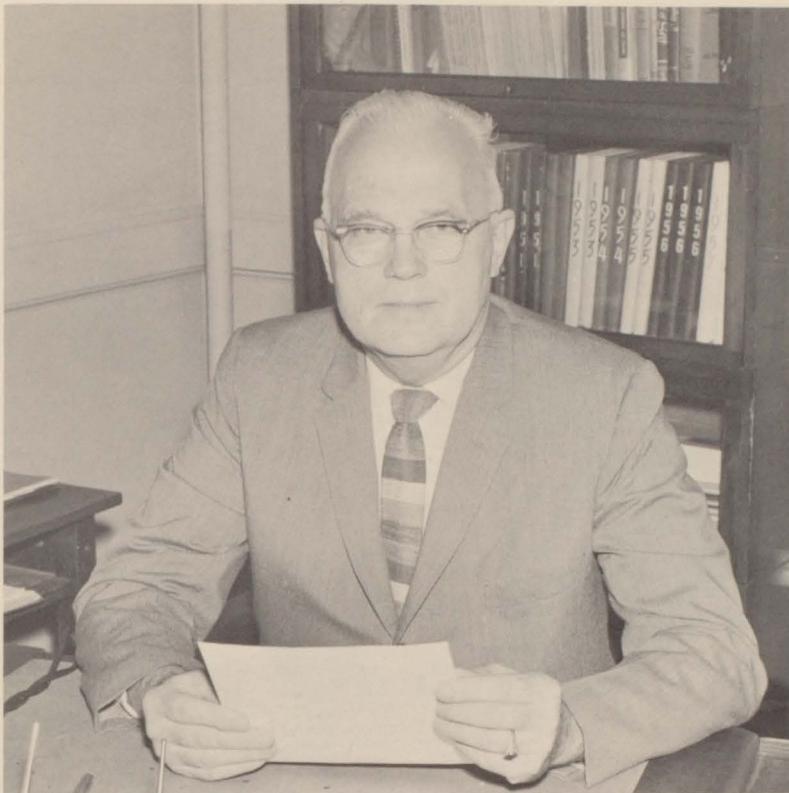

Character, as well as knowledge, is the concern of education. The components, teachers and students, are vital. By example, the faculty adds to the character foundations laid at home by the students' parents.

MEMORIES '62 has several features unique to a Bloomfield High School yearbook. We have adopted a new, larger, nine-by-twelve size. The change enables us to present more material on a page with better designs. In the format, seniors are featured throughout the entire book. Such an arrangement places the senior in the whole stream of student life—amid the faculty and curriculum, the activities and sports. Third, the combination of faculty and curriculum in montage produces the effect of a simulated classroom; it pictures people in relation to their purposes.

The kaleidoscope motif in MEMORIES is the symbol in which our teachers, students, classes, activities, and sports form a living pattern of our class of '62. Just as the tiny particles of colored glass fall into place in a kaleidoscope to form variegated patterns, so our various experiences at B.H.S. will fall into correlated patterns of knowledge to help mold our future.

# Retiring Teachers

## FLOYD T. JORDAN

A man of multiple abilities and spirituality who liked young people, Mr. Floyd Jordan enjoyed teaching. The thirty years he spent at Bloomfield High School, as director of the band and orchestra and later as a teacher of history, were characterized by his friendly, quiet manner and musical talent.

Mr. Jordan graduated from North Central College, Illinois, and took his master's degree at New York University, with later graduate work at the University of Iowa and Rutgers University. He taught in Center County, Pennsylvania, before coming to Bloomfield.

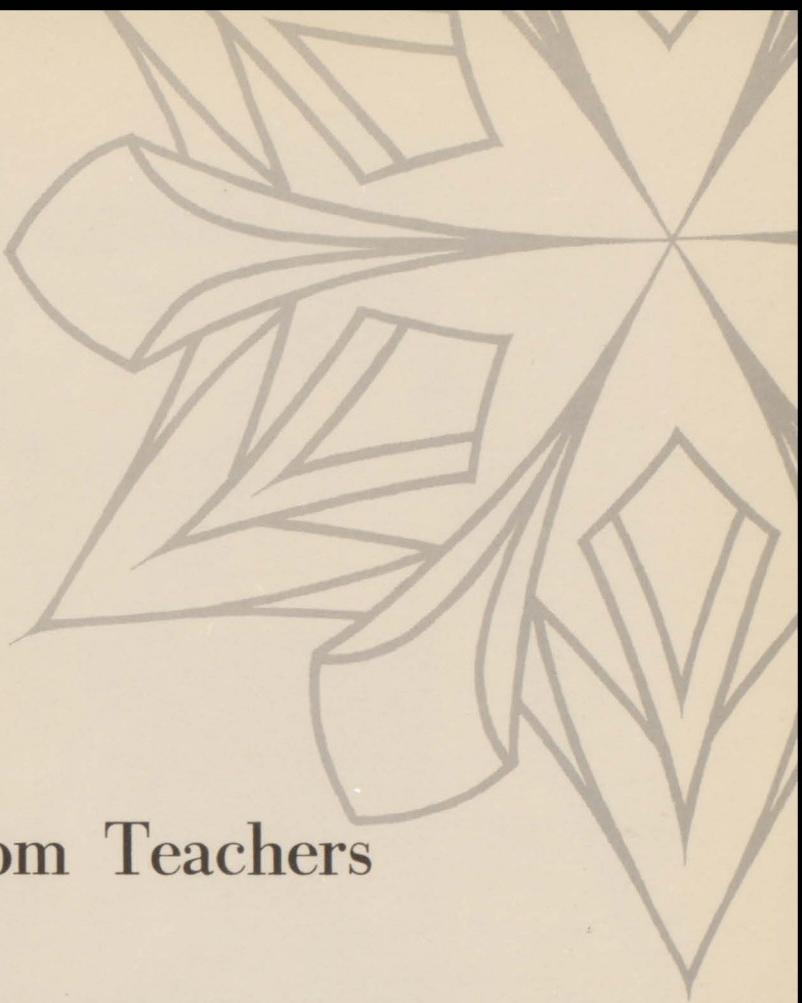

In high school and college, he starred in track and music. A pianist and an organist, Mr. Jordan is also proficient in the brass instruments. He qualifies as a one-man band, combining the drums, harmonica, and guitar.

## OFFICER FRANK DIMMICK

Our sincere thanks and deepest gratitude to Officer Frank Dimmick of the Bloomfield Police Department. His retirement brings to a close a career of supervising the flow of traffic and pedestrians on the corner of Broad Street and Belleville Avenue. His alertness and friendliness have served to make him one of the most respected and loved of the "Broad and Belleville contingent" in B.H.S. history.

Officer Dimmick's greatest achievement has been his wonderful safety record. Throughout his thirty-seven years on the force, thirty of which were spent at our corner, he has strived above all to maintain safe conditions and order. His excellent record attests to his success.

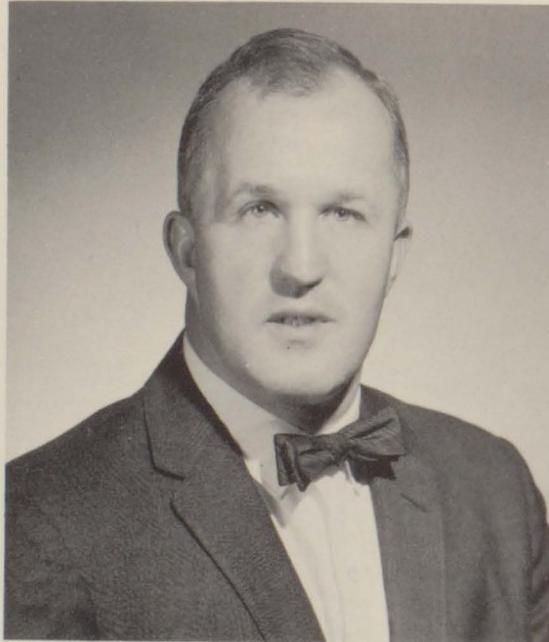

## Senior Homeroom Teachers

Not Pictured: Miss Mabel Jenkins, Miss Janette Hart, Mr. Kenneth Rogers, Mr. Rhys Craver.

THOMAS H. SCHENCK

Counselor and friend combine to give the boys of '62 their adviser—Mr. Thomas Schenck. Working under the handicap of assuming guidance of our class in its senior year, he has worked diligently to make our endeavors together successful. Indeed, we owe him a debt of gratitude.

As a counselor, he has helped us all in some way—toward a college career, a military career, or technical career. As a friend, he has helped us to assess our own abilities and qualifications, and to make our own applications to fulfillment and success in life. All of us will remember his share as a social adviser in making our commencement and prom gratifying experiences.

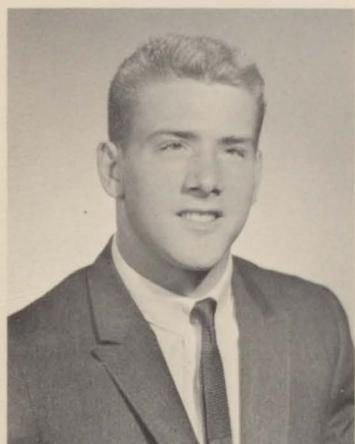

MISS DORIS BILL

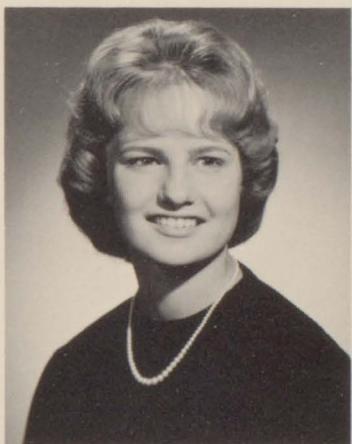

It is with sincere appreciation that the class of 1962 acknowledges the time and interest Miss Doris Bill has expended on our behalf. Although we have known her only one year, her tireless supply of aid and good will have made her a much appreciated friend. Miss Bill's guidance through this crucial year has helped to point the direction and to smooth the road to future ambitions and realizations.

**NOW, GENTLEMEN, THE QUESTION IS: "SHOULD WE GIVE GREEN STAMPS?"**

The Guidance Department plays a large and important role in the life of each student throughout his days at Bloomfield High School. This includes maintaining a close relationship between parent, student, and school. When the student first enters B.H.S. as a sophomore, the guidance counselor helps him adjust to the environs of a new and different school. Through the junior year, the counselor strives to help the student determine his own abilities and how they may best be applied in his future. In the senior year, the counselor helps students to make final decisions for advanced education, business careers, or the military services.

Interpretation of literature and development in creative writing are two of the skills especially stressed in this course. During the sophomore year, *Silas Marner* and *A Tale of Two Cities* are among the books read and analyzed. The junior year course consists of a study of American literature, with special emphasis on writers like Ernest Hemingway and Edgar Allan Poe. English literature, accenting such greats as *Beowulf* and Shakespeare's *Macbeth*, is covered during the senior year. Throughout the three-year course, extensive work is also done on grammar, improvement of vocabulary through *Word Wealth* studies, and, especially, the aforementioned creative writing.

The highlight of the English program at Bloomfield High School is the Advanced Placement English course, under the direction of Doctor Parsons. It is given to specially selected college preparatory students, with the aim of making them eligible for advanced placement in college English programs. The course is devoted primarily to advanced reading and the development of writing skills.

Mr. Frank Leite instructs the journalism classes in the make-up of a newspaper. Students gain a basic understanding of the techniques of mass media in Journalism I, and some study of the graphic arts is included in the program for Journalism II. The importance of layout, the preparation of copy, the recognition and gathering of news, and feature writing are also included in the course of study.

The reading laboratory has been established to encourage pupils preparing for college to increase their comprehension and speed of reading. It maintains the necessary tests and equipment for efficient diagnosis of each student's ability and sufficient variety of reading materials for each to practice effective reading skills. The ophthalmograph, reading accelerator, metronoscope, flash-meter, S.R.A. Reading Laboratories, books, plus a Book of Your Choice Day stimulate the student's interest and, therefore, skills in this subject.

Poise and confidence in public speaking, and correct speaking methods and attitudes are aims of the speech course. Speech, the prerequisite for the dramatic arts course, is beneficial to students in their preparation for college and business careers.

**CONGRATULATIONS ON A JOB WELL DONE!**

B.H.S. joins the front ranks in the teaching of modern languages with the installation of a language laboratory. Fourth-year French students, under the direction of Mr. Caramagna, are shown demonstrating the advantages of this electronic device. Each booth contains a microphone with which the pupil may contact the instructor or record on his own tape. Also included among the student's equipment are earphones that transmit recorded lessons in a foreign language. The teacher sits at the master console by which he may talk to his entire class or to individuals.

Primarily intended for first and second-year students, the language laboratory prevents the formation of poor language habits before they begin. The language classes benefiting from the lab are Latin, Spanish, German, and Italian.

# SOCIAL SCIENCE . . .

In our world of tension, the social sciences are most important. Required and elective courses are designed to give the student a better understanding of the world around him by examining past events. Junior year is spent in intensive study of the men and events which made America. From the *Mayflower* to the Korean War, each aspect of our nation's history is analyzed. Economics and government, municipal to national, are scheduled for senior year. The Constitution is exhaustively examined. Economics, including finance and banking, occupy the second semester for fourth-year students. Electives include world history, which gives an excellent opportunity to learn about other people—their customs, beliefs, and objectives.

# SOCIAL SCIENCES . . . *Pupils*

The Social Science Department represents an important phase of the curriculum offered by B.H.S. It formulates the fundamental foundation necessary for understanding world tensions. The opposing forces of the cold war—democracy versus communism—are studied in detail.

On a national level, the function of the Federal Government system is studied and analyzed for both strong and weak points. The emphasis of U.S. History II is on the importance of the individual in the maintenance of a government by the people, for the people. Once the policies of the U.S. as a united body have been learned, the student is prepared to study these policies in our role as a leader of the free world.

In the democratic debate, students discuss the United States' foreign policy in relation to the rest of the world. The effect of current events on the world situation is readily seen by the department's emphasis on "trouble spots." Animated class discussions analyze the background and history of these "trouble spots."

Biology and physics compose the Science I curriculum. The biology course is divided into both technical and practical classes. Body functions and the development of life from the lowly amoeba to complex man are covered in technical biology. The high-lights of the course are the intriguing dissection laboratories. Many a crayfish has fallen under the knife of our enthusiastic students. Practical biology classes also cover these subjects, but not to the above degree of technicality.

Physics is the science dealing with matter and energy. Through the efforts of Mr. Mageehan and Mr. Grote, the student is able to grasp the basic concepts of the world of science. Electricity, weather, velocity, motors, and atomic energy are among the topics covered. It is a course designed to challenge the mind with intriguing problems and stimulative laboratory experiments. Biology and physics are only two of the courses contributing to the excellence of Bloomfield High School's Science Department.

Chemistry provides the student with the opportunity to draw his own conclusions from his laboratory experiences. The course focuses on the world around us. First, the simplest elements, and then more complex substances, are scrutinized. Since new discoveries are always being made, chemistry is an ever-changing science.

Laboratory periods are an intrinsic part of any chemistry course. In the laboratory, the student learns to follow directions accurately. He carefully records his observations, and then forms a conclusion based on these observations. The student is forced to reason in a logical manner. Chemistry is a vital subject in our modern world of science.

Our modern, scientific world demands that students be able to pursue a logical course of thought as taught in mathematics. In plane geometry, theorems are analyzed and proven by a step-by-step process. Solid geometry extends the principles learned in plane geometry to three-dimensional figures. Algebra II is a continuation of Algebra I. This course furthers the student's knowledge of fundamental concepts and introduces him to quadratic equations. Trigonometry deals with the functions of triangles and their application to engineering and related fields. Math 12 is a combination course consisting of Algebra III, solid geometry, and advanced trigonometry. It is designed for those students who intend to continue with mathematics in college. Math 10 provides a general review of arithmetic principles. Mathematics is an extremely vital phase of life at B.H.S.

# BUSINESS EDUCATION . . .

A thorough training in office procedure is provided by the business education course at B.H.S. Beginning in the sophomore year, a prospective secretary or office worker can start her training with typing and bookkeeping or record keeping. Good marks in typing and English are required to enable the student to study stenography and typing, bookkeeping, and Business English in the following year. Business English demonstrates business forms and usage. Senior-year business activities include secretarial training or office practice with the use of switchboard, dictaphone, and other business machines.

*AH, G'WAN, HE WON'T BITE.*

The Industrial Arts Department extends to students with technical interests an opportunity for vocational training for a career in industry. The preparation and properties of metals, plastic and wood are studied. With a fundamental knowledge of the nature of the materials and tools used, the students turn their imagination to creativity.

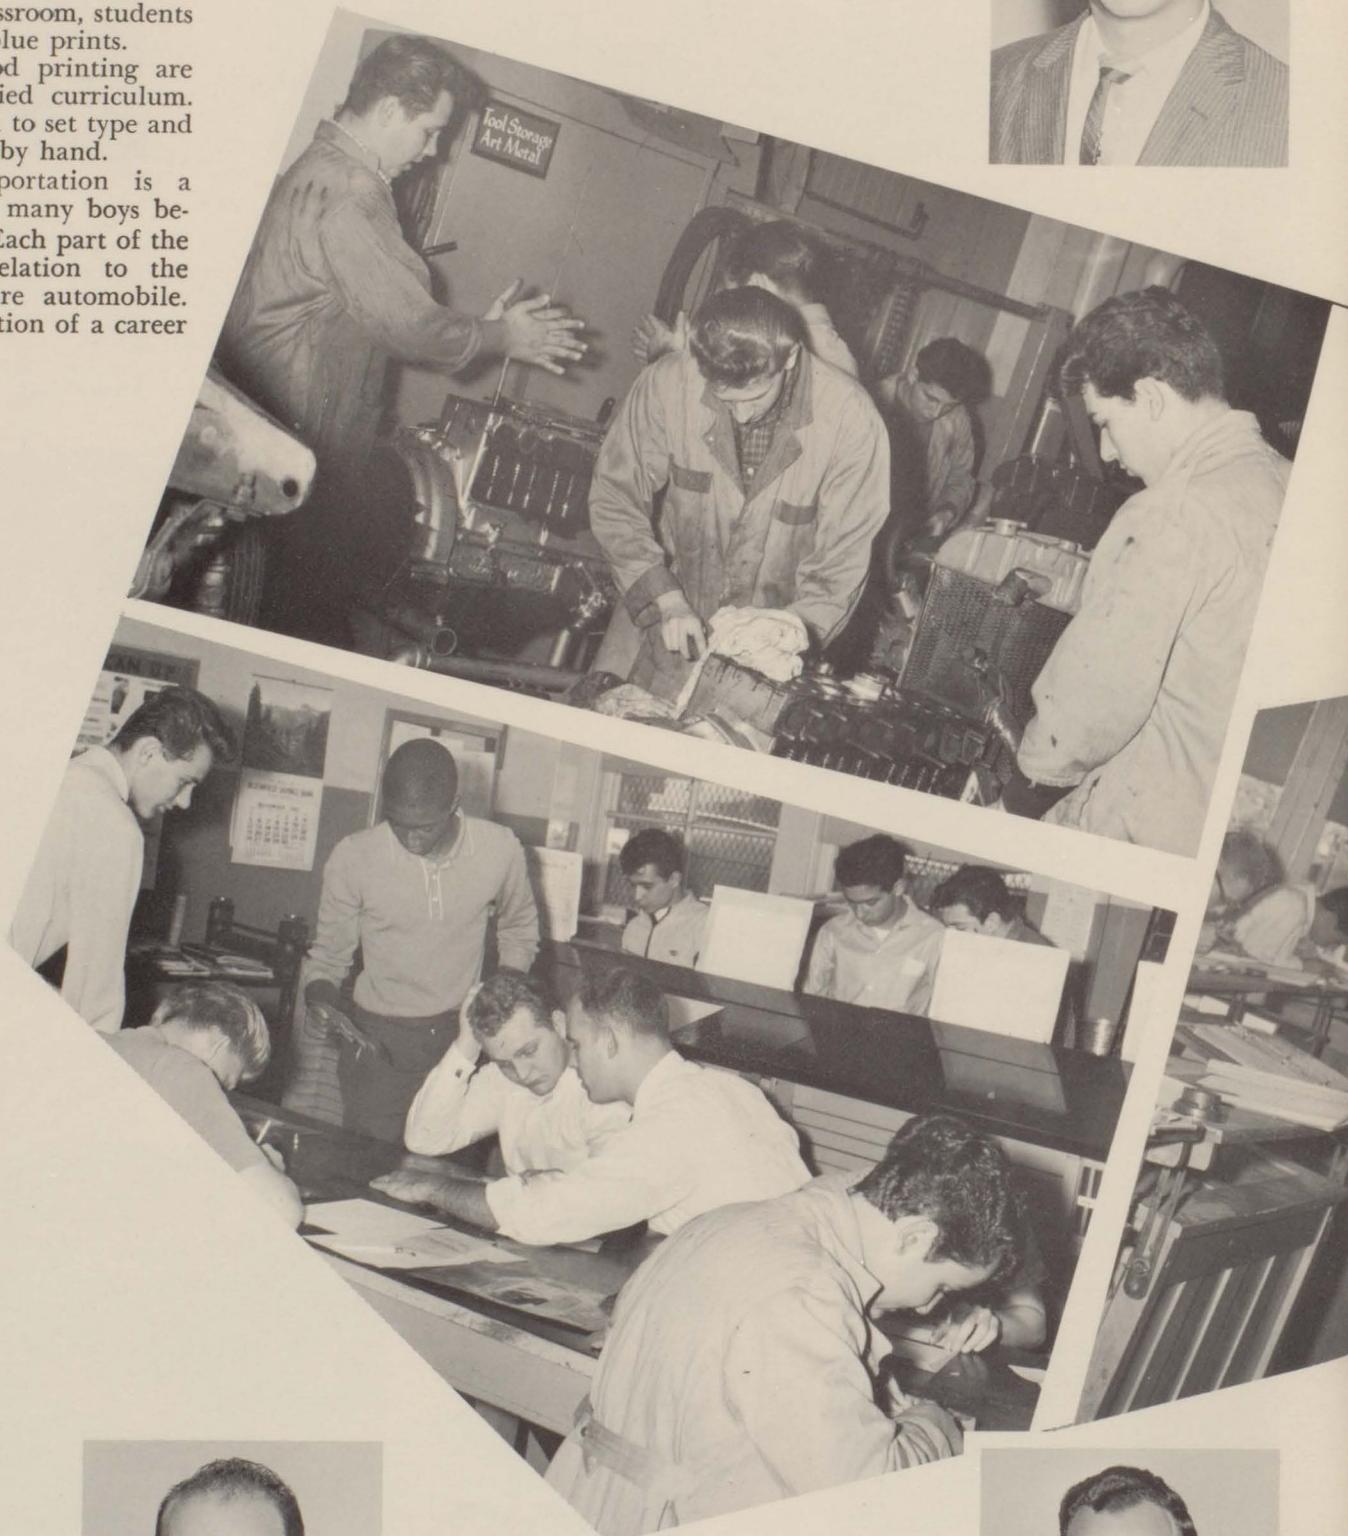

Another phase of this curriculum emphasizes the necessity for accurate drawings. In the drafting classroom, students also prepare their own blue prints.

The essentials of good printing are also a part of this varied curriculum. Here, students may learn to set type and operate printing presses by hand.

Mechanics of Transportation is a course which appeals to many boys because of its practicality. Each part of the engine is studied in relation to the functioning of the entire automobile. Here may be the foundation of a career as an auto mechanic.

# FINE ARTS . . .

Among the aesthetic adventures into which a B.H.S. student may channel his artistic talents are art, crafts, singing, and music.

In Art I, foundation or basic art is studied. During this course, the fundamentals of design are learned and applied. Second year art begins the commercial study of lettering and layout design. Special tools are used for printing, and book jackets, album covers, and billboards are created. Art III includes sketching the human form. This process begins with block outlines, which are filled in as later skills are acquired.

Crafts provide other artistic variations in clay, mosaics, basketry, and jewelry-making. Creative ability is the most important factor for success in these courses.

Vocal music in our high school is headed by the Varsity Choir under the direction of Mr. Ralph Diller. This group performs at holiday programs and for other school and town organizations. Other singing groups include Girls' Glee Club, Boys' Chorus, the Belletones, and the Bengalaires. Co-operation, as well as hard work, are two ingredients for success in these groups.

Another section of our Music Department incorporates the band, orchestra, string ensemble, and Serenaders. Many hours of practice are required to attain the ultimate goal of harmonious sound.

YOU MEAN THAT'S EDIBLE?

The new auto-driving trainer course is the first one of its kind in the state. In this program, eight students at a time are taught the basic fundamentals of driving by the use of individual cars which simulate actual driving conditions. Bloomfield's driver education program consists of three entirely different courses: classroom driver education, which is compulsory in the junior year; behind-the-wheel training, which gives students actual driving practice under the guidance of experienced instructors; and the new driving trainer program. Through careful instruction, pupils can learn proper driving attitudes, as well as rules and regulations governing driving, and they cultivate favorable habits for safe and courteous drivers.

Two phases of the health course provide invaluable knowledge for the future. They are recognition of the signs and symptoms of common illnesses and their treatment and the interpretation of doctors' orders. A prime objective in the course is the development of an understanding of human behavior.

# HEALTH, DRIVERS' EDUCATION . . .

A variety of activities is offered in the physical education curriculum. Among the intramural activities in which the girls participate is the popular sport of archery. Any girl may learn archery and possibly qualify for the team. The girls not only acquire skill, but also learn good safety habits when shooting or preparing to shoot. Precision marching for sophomore and junior girls gives good preparation for the Drill Team. Continued into the senior year, marching also aids in grace and poise.

Boys' calisthenics encourage the development of better co-ordination and precede the actual gym workout. The warm-up exercises include push-ups, sit-ups, knee bends, and toe touching. B.H.S. offers various physical activities to keep all its students fit in both mind and body.

# HOME ECONOMICS . . .

In home economics, girls acquire a basic understanding of foods and sewing in preparation for college and later life. A special interest in one of the many areas in this ever-expanding field leads many girls to rewarding careers. The foods laboratory acquaints students with meal-planning and balancing and points toward future study in food nutrition and dietetics.

Textiles and basic sewing skills are included in the sewing course. Future fashion designers realize the necessity of mastering these techniques before attainment of their ultimate goal is possible.

# CAFETERIA . . .

Under the direction of Mrs. Alstein, the Bloomfield High School cafeteria functions smoothly as an integral part of our school life. A well-equipped kitchen and a well-trained staff serve to produce food of a high quality. The friendly atmosphere and informal air maintained in the cafeteria have made it one of the best-loved rooms in B.H.S.

The tasks of the cafeteria staff are manifold. They plan the menu, prepare the food, and maintain a state of shiny cleanliness in the kitchen. Not only do they provide food for the many B.H.S. high school students, but they serve the faculty and also prepare the lunches for the Bloomfield Junior Highs. We owe much gratitude to our hard-working cafeteria staff.

SENIOR

Extracurricular activities explore new horizons and develop existing interests. Clubs rank with academic knowledge as the basic preparations for postgraduate life. Clubs at Bloomfield High extend the educational program to include fun and information at an informal level.

Activities serve other purposes, as well. Students see democracy at work on a small scale in the parliamentary working of the clubs. Democratic election of officers previews the responsibilities of the adult voter, and members also learn respect for others' right of opinion. Another important factor concerns developing the knack of getting along with other people. Co-operation marks the true spirit of the organization. Every club has a purpose for existing, whether it be to understand better foreign countries, teach a skill, or introduce students to a profession.

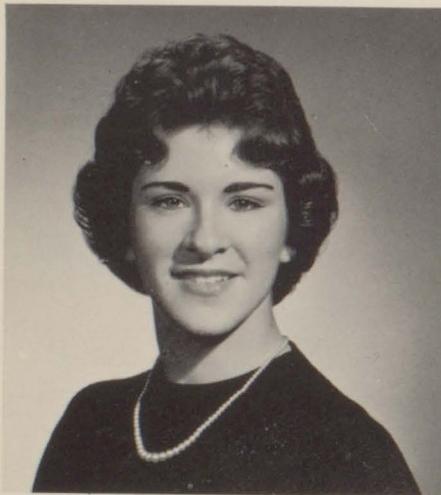

Bloomfield's extracurricular activities are a vital part of each student's life.

Lynne Cohen, Assistant Editor-in-Chief.

Three of the 1962 yearbook staffs are the editorial, literary, and auxiliary. Together they strive for the high quality and the unity typical of past books. Ultimately, perhaps the greatest satisfaction of all those connected with **MEMORIES** is pride in the end product.

**MEMORIES '62** is the combined efforts of many staffs supervised by the editor-in-chief, the assistant editor-in-chief, and the editorial heads of each staff. Primarily, Fred's responsibilities include the co-ordination of the book, making sure deadlines are met, and directing the staffs. All of the copy of the yearbook is the responsibility of the literary editor—Mary G., Judy, Gail, Linda V., Jane, and Linda S. Write-ups, headlines, captions and other written material are credited to this hard-working staff.

# Showcases For Creative Abilities

## JOURNALISM ANYONE?

The STUDENT PRINTS provides those students who have a flair for writing with the satisfaction of seeing their creativeness appear in newspaper print.

The unparalleled achievements of this fine newspaper have long been guided by the adage: "All the news that's fit to print." Chris Gasior and her staff have perpetuated the high ideals of journalism. We are again proud to congratulate the staff on receiving the Columbia Press Award.

A note of thanks is due Chris and her staff for keeping the student body so well-informed on the latest events of B.H.S. life. STUDENT PRINTS provides an excellent media for greeting new teachers and getting acquainted with various active students. Its complete coverage of sports allows the most avid sports fan to keep abreast of team standings and the dates and places of forthcoming games. With its wide coverage of the many activities of B.H.S., STUDENT PRINTS proves to be an integral part of our school.

STUDENT PRINTS, LITERARY STAFF: Carol Sokobin; Chris Gasior, editor-in-chief; Carol Cayward; Nancy Simkin; Mr. Leite, adviser; Robert Becker (seated)

The newly-established literary magazine, the *Spark*, endeavors to promote creativity among students by publishing their original creations annually. All forms of art work and literature—essays, poetry, themes and short stories—may be submitted by all three classes. Just a spark of talent and much originality are the only requirements for submitted material.

With Dan Sammons, the editor-in-chief, rests the responsibility of preparing the final copy for the printer. Assisting him as literary editors were Nancy Grossman, Walter Pickut, and Helen Goldman. Making the budget balance was the task of the treasurer, David Spahn. Publicity and public relations were the combined tasks of Terry Weihrauch and Jerry Silberberg.

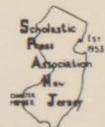

Another new "edition," *La Voix*, has become the French newspaper of our school as well as of many neighboring schools. Begun as a project to earn money for the support of the club's foster child, it is now an instrument of promoting unity among neighboring French Clubs.

The responsibility of organizing the paper was vested in Jane Shaw, editor-in-chief, and in Kathy Thibodeau, assistant editor. Jill Van Buskirk, news editor, and Edwina Yuille, feature editor, have carefully guided their reporters in the uniting of appropriate articles. For the deft illustrations, *La Voix* is deeply indebted to its art editor, Jeff Patten.

Under the guidance of Mrs. Elinore Partridge and Mrs. Marcia Moskowitz, the National Honor Society is a senior organization composed of the top students in the top 10 percent of the class. Faculty members select the eligible candidates after careful examination of school records and character. An impressive induction ceremony is held in which membership cards, certificates, and corsages or boutonnieres are given to each new member. Several meetings are planned, some of which include informative speakers. The climax of the year is the annual trip to New York or Philadelphia; during this excursion members may visit museums, the theater, or other places of interest. One project of the Honor Society and its advisers this year is aiding another Bloomfield secondary school to form its own National Honor Society.

Because membership in the National Honor Society stresses scholarship, leadership, service, and character, all members accept responsibility with the knowledge that they will do their utmost to fulfill whatever is required of them. Hard work is no impediment, either, for these qualified students are always willing to sacrifice time and energy for a worthwhile cause. Their untiring efforts to better themselves, their school, and their community have resulted in the well-rounded members of our National Honor Society.

STUDENT COUNCIL: Mr. Fitzgerald, adviser; Terry Rowe; Dennis Booth; Mary Bringewatt; Ed Karytko; Kay Laverick

One representative from each homeroom constitutes this representative student body—the Student Council. Although the Council accomplishes most of its work in committees, the representatives serve as instruments of communication in informing their fellow students of the Council's activities.

As a service organization, the Student Council seeks to serve the community as well as the student body. It co-ordinates such activities in the high school as the Community Gift Bureau, Officer Frank Dimmick Project, and the United Fund. Selling school supplies and sponsoring assembly programs for the benefit of the student body are also among the Council's many activities.

This year, the Council has focused its attention on instituting a Foreign Exchange Program. Under this program, a student from a foreign nation will live and attend school in Bloomfield for one year. After B.H.S. has participated in this program for one year, we will be eligible to send a Bloomfield student abroad.

Sponsored by the local Kiwanis Club in co-operation with the school officials, the Bloomfield Key Club is a service club for eighty-five boys from the tenth, eleventh, and twelfth grades.

Many ideals are embodied in the Key Club. In service to the school, members sell the *New York Times* and the *Herald Tribune* to the student body; sponsor the annual May Queen Dance to raise funds for the Delaware Valley Rehabilitation Center; usher at all school functions, such as shows, assemblies, and graduation; and perform other beneficial services to the school.

Benefiting community activities sparks great interest among the Key Club members. They have contributed more than two hundred cans of food to needy people in Bloomfield, campaigned for the United Fund, and are now occupied with work on Bloomfield's Sesquicentennial. The bus shelter donated by B.H.S. in honor of officer Frank Dimmick was suggested by the Key Club boys. # *Serve School, Community*

GIRL RESERVES: Connie Rabasca; Gail Sellar; Susan Cornwell;  
Ruth Ann Cozza; Terry Rowe; Miss Drake, adviser

The Girl Reserve Club, composed of fifty junior and senior girls, is the girls' service club of Bloomfield High School. Each year, junior girls qualifying for membership are inducted into the organization at a banquet held at the Friar Tuck Inn. According to the Girl Reserve code, each member agrees: to be Gracious in manner; Impartial in judgment; Ready for service; Loyal to friends; Reaching toward the best; Earnest in purpose; Seeing the beautiful; Eager for knowledge; Reverent to God; Victorious over self; Ever dependable; and Sincere at all times.

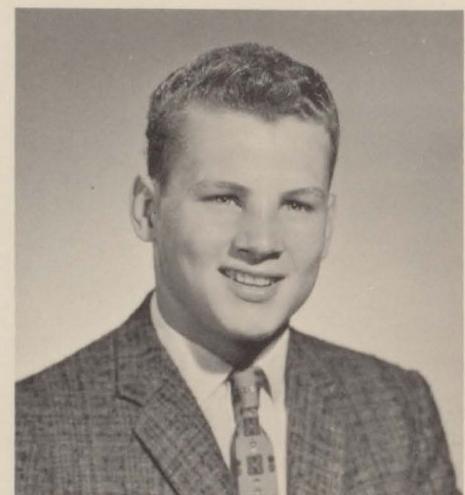

Purposes of the Girl Reserve Club include: raising funds for charity; providing service to the school and the community; and enjoying good times together. Each year, club members give their time and abilities to school and community projects. Ushering at many school functions and making favors for a local hospital are but two of the many services performed by the Girl Reserve Club. By working together, each girl gains respect for the abilities and rights of others —a basic precept of later life.

GIRLS' CITIZENSHIP INSTITUTE: Jo Ann Margolis; Mr. Rogers, adviser; Linda Slater; Linda Vincent; Mary Bringewatt; Mary Gordon

Held in conjunction with Boys' State, Girls' State serves to develop civic responsibility and good fellowship among girls from high schools throughout the state. The week-long convention is held at Douglass College, separate from Boys' State; but the activities, including lectures and a mock election, are parallel. The climax of the week is a luncheon and formal ball, which brings to a close seven days of fun for all.

In both Boys' State and Girls' State, the underlying principle is fellowship. In Girls' State, each girl is brought in contact with hundreds of strangers. She must learn to get along with others and to work with others in mutual fellowship. These skills are mandatory for happiness and success in future college life, and Girls' State provides a unique opportunity for many girls to develop them while learning and having fun in a college atmosphere.

Each year the Bloomfield Women's Club, the Cedar Grove Women's Club, and the Junior Women's Club

of Bloomfield sponsor five girls to attend Girls' Citizenship Institute. The institute is held in June at Douglass College and consists of five days spent in a college atmosphere with girls from throughout the state. The girls are chosen from the junior class by the faculty and representatives of the above-mentioned clubs.

The five days at Douglass are filled with lectures, fellowship, and fun. Each day there are three lecture sessions, dealing with government, good citizenship, college, and the importance of education in the business world. Between lectures, the girls are free to swim, play tennis, or just plain loaf. High lights of the week include a tour of the college, a trip to Trenton, including a tour of the government buildings and other landmarks and an interview with the governor, and a talent show, with each house presenting a skit. It is a happy week long remembered by all.

# Civic Responsibilities

Rutgers University plays host each spring as boys throughout New Jersey attend Boys' State. Sponsored by the local chapter of the American Legion and by various other service clubs, several junior boys from Bloomfield and Cedar Grove are chosen for this week-long convention.

Much fun mixed with the work makes this week exciting. Each day brings new and interesting lectures on state, local, and national government, as well as other topics. Between these, the boys march, participate in sports, or just relax. Throughout the week they prepare and campaign for the big election. Election day comes, and a governor, senators, and assemblymen are voted into office. Various skills are enacted through this mock legislature and later suggested to our official government at Trenton. The boys not only gain a

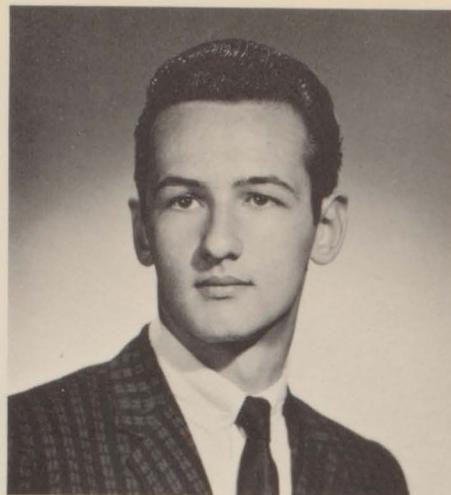

better understanding of our system of government, but also develop a deep concern for its future effectiveness. This week is devoted to better citizenship and good fellowship.

Each spring the service clubs of Bloomfield, through the institution of Youth Week, seek to acquaint students with the town of Bloomfield. Students learn what Bloomfield has to offer by becoming familiar with the town's court system, industries, local businesses, and banks.

Students from U.S. History II classes, under the supervision of Mr. Weissbach, visit the town hall and county courts, as well as such industries as General Motors, Westinghouse, and Schering Corporation. In arranging for these visits, contacts are made through the Lions, Kiwanis, Rotary, and Unico Club, making Youth Week a genuine success.

# SENIOR SPIRIT

As a vital facet of our years at Bloomfield High School, the various sports provided the fans with an opportunity to cheer their favorite teams on to victory. School spirit sparked the games, whether they were football, basketball, or baseball. Led by the energetic cheerleaders, Bloomfield fans roared their approval of jobs well done, grew tensely silent at crucial moments, or buried their disappointment with an optimistic "Wait till next time." Whether the teams won or lost, the contests afforded many students hours of enjoyment as they thrilled to the athletic prowess of their friends.

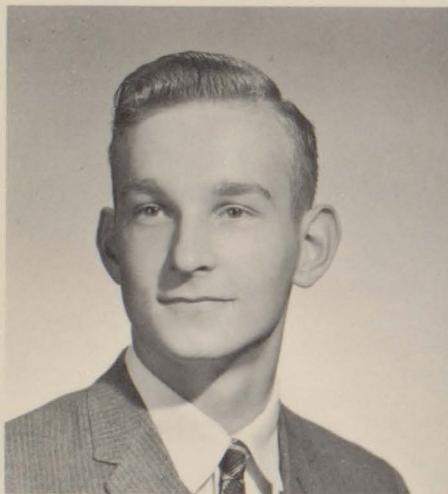

Much credit must be given to the boys on the teams for the time and energy they expended to do the best job possible. In addition to student recognition, these boys benefited in other ways. Under the guidance of dedicated coaches, the athletes learned the importance of team work and fair play. Besides giving the fans hours of pleasure, the team members gained valuable experiences from their athletic activities.

# Highlight Fall Gridiron

Injuries, not competitors, were our most difficult opponents this year. At one time or another, all three co-captains, Mike Ellis, Gary Kammerer, and John Czycki, were out of action because of various ailments. Even with all this hard luck, Coach Bogusz's boys won three, lost five, and tied one. The highlight of the season was our third game where we, as underdogs, beat Clifton in the last minute — 25 to 21. Another bright spot occurred in the Montclair game in which we unveiled a "modified shotgun offense" and barely lost. Excitement and good football filled the 1961 season.

The queen of the football season this year was pretty Joanne Marinello. She was attended by a court consisting of Penny Finck, Judy Mastachio, Gayle Krynick, Yolanda Pucci, and Sue Bell. The contest is sponsored annually by the Student Council.

Led by captain Steve Clancy and high-scoring Tony Verdi, the basketball team had a very successful season, winning fourteen games and losing only seven. Good team balance was the key to the success of our hoopers. It was no surprise, then, when we were seeded seventh in the E.C.T. After a loss to the Streaks from South Side eliminated the team, they came back to wallop Central in the state tournament and then lose to Weequahic in a close game. In the Big Ten Conference, B.H.S. finished second, one game behind West Orange. Head Coach George Cella should be proud of this year's team.

# MEMORIES KALEIDOSCOPES THE PAST ...

## BLOOMFIELD PUBLIC SCHOOLS BLOOMFIELD, NEW JERSEY

SENIOR HIGH SCHOOL  
160 BROAD STREET

HARRY M. RICE  
Principal

CHARLES E. MORGAN  
Vice-Principal

PETER WILSON  
Assistant Principal

June, 1962

To the Class of 1962,

Although our days together at Bloomfield Senior High School draw rapidly to a close, our memories will last on through the years. At some future time when we try to remember the name of that favorite teacher or the score of that game, we, through our kaleidoscope, can easily turn back the clock to find such information. Thus, no matter how widely scattered we are, MEMORIES '62 will bring back recollections of our three years together.

For their many long hours of unselfish devotion, I thank the members of the staffs who produce this yearbook. To our advisers, Mrs. Koch, Mr. Eller, Miss Whitsel, and Mr. Willever, I give my sincere thanks for their constant help.

To you, the 108th graduating class, MEMORIES '62 is a kaleidoscope of our days together at Bloomfield Senior High School. Along with your yearbook goes the wish of MEMORIES staffs for health, success, and happiness to the Class of '62.

Sincerely yours,  
*Fred P. Grill*  
Editor-in-chief
